### **DETAILED ACTION**

1. According to a preliminary amendment filed on May 15, 2006, the applicants have canceled claim 18 and furthermore, have amended claims 9 and 11.
2. Claims 1-17 are pending in the application.

### ***Election/Restrictions***

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) In part 1-17, drawn to Compounds of formula (I) represented by compounds of formula (Ia) of claim 8 where variable Z represents C, Y represents a bond or CH<sub>2</sub> group and G represents substituted/unsubstituted phenyl group, pharmaceutical compositions containing these compounds and methods of treatment using these compounds.

Group II, claim(s) In part 1-17, drawn to Compounds of formula (I) represented by compounds of formula (Ia) of claim 8 where variable Z represents O or S, Y represents a bond or CH<sub>2</sub> group and G represents substituted/unsubstituted phenyl group, pharmaceutical compositions containing these compounds and methods of treatment using these compounds.

Group III, claim(s) In part 1-17, drawn to Compounds of formula (I) represented by compounds of formula (Ia) of claim 8 where variable Z represents N, Y represents a bond or CH<sub>2</sub> group and G represents substituted/unsubstituted phenyl group, pharmaceutical compositions containing these compounds and methods of treatment using these compounds.

Group IV, claim(s) In part 1-17, drawn to Compounds of formula (I) represented by compounds other than defined above for groups I, II and III, pharmaceutical compositions containing these compounds and methods of treatment using these compounds.

Art Unit: 1625

4. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

There is no common core which in the Markush Practice, is a significant structural element shared by all of the alternatives; see PCT Administrative Instructions Annex B Part I (f) (i) (B) (1).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention. It is of note that if applicants elect group IV, they must define the common core structure ( specific values of rings A and B ), variables Y, G, W and D since this group is subject to further restriction based on the values of these variables.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof.

Applicant may submit evidence or identify such evidence now of record showing the

Art Unit: 1625

inventions to be obvious variants or clearly admit on the record that this is the case.

Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charanjit S. Aulakh whose telephone number is (571)272-0678. The examiner can normally be reached on Monday through Friday, 8:30 A.M. to 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres can be reached on (571)272-0867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
